DETAILED ACTION

1. Please include the new Art Unit 2616 in the caption or heading of any written or facsimile communication submitted after this Office Action because the examiner, who was assigned to Art Unit 2615, will be assigned to new Art Unit 2616. Your cooperation in this matter will assist in the timely processing of the submission and is appreciated by the Office.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Species I, Fig. 4A.
 - A. Subspecies IA, Fig. 4B, a distinct data structure.
 - B. Subspecies IB, Fig. 4C, another distinct data structure.
- II. Species II, Fig 5B
 - A. Subspecies IIA, Fig. 6A, a distinct read buffer structure.
 - B. Subspecies IIB, Fig. 6B, a second distinct read buffer structure.
 - C. Subspecies IIC, Fig. 7A, a third distinct read buffer structure.
 - D. Subspecies IID, Fig. 7B, a fourth distinct read buffer structure.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is deemed to be no generic allowable claim.

Examiner notes that electable species are Species I with either subspecies IA or IB, or Species II with one of subspecies IIA, IIB, IIC, or IID. **Any election may include only one subspecies.**

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claim to a non-elected invention, the inventorship must be amended in compliance with 37CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 DFR 1.48(b) and by the fee required under 37 DFR 1.17(I).
